PROJECTS

Seneca Music - Seneca Music is a web app that allows users to discover new release music from Spotify and add their favorite tracks to a list. The app also allows users to search for specific artists and preview their songs. Built using Angular and the Spotify Web API.

URL: <https://seneca-music-de345.web.app>

KabanNote - This project is a simple task management web app that allows users to create and manage tasks organized into swimlanes.

URL: <https://kanban-board-5e8bd.web.app>

Department-Employee-Tracker - A web application for managing information about departments and employees in an organization. This application uses a MongoDB database to store and retrieve information, and uses Handlebars templates to render the user interface in the web browser. The application uses RESTful API design principles to enable CRUD (create, read, update, delete) operations on department and employee records.

SKILLS & TECHNOLOGIES

Javascript

Node.JS

React.JS

Angular.JS

Express.JS

Typescript

SQL

MongoDB

RESTful API

ASP.NET Framework

MVC & MVVM

Postgres

EDUCATION

Ontario College Advanced Diploma: Computer Programming & Analysis , Expected in 01/2023

Seneca College
